

INSTALLATION INSTRUCTIONS DEF Enclosures

Please read all instructions completely prior to installation. These instructions do not supersede local laws and regulations. Always comply with local requirements.

Western Fiberglass DEF Enclosures are designed and built as a portable, free-standing unit. They require no additional structure to operate.

1. Set enclosure on firm, level surface.
 - a. The surface may be compacted earth, crushed rock, concrete, asphalt or similar.
 - b. The unit may be secured to the earth by attaching “L” brackets to each corner of the enclosure. The brackets should be secured to the vertical aluminum corner post (either inside or outside) using self-tapping screws and epoxy adhesive.
2. Install DEF equipment per manufacturer’s installation instructions.
3. Ensure electrical supply is according to local code.
4. Inspect DEF tank. Ensure all valves are located in the proper position.
5. Fill DEF tank to correct level.
6. Inspect all tank fittings for leakage.
7. Inspect/maintain all DEF equipment per manufacturer’s installation instructions.
